SALE TERMS & CONDITIONS

TERMS: Terms of the sale are cash, check or other terms agreed to, in writing, between the seller, buyer, and sale manager, payable immediately upon conclusion of the sale before animals will be moved. We reserve the right to require a certified check as settlement before releasing any cattle.

PURCHASER'S RISK: All animals are the owner's risk prior to their sale and become property of the purchaser as soon as declared sold by the auctioneer.

BIDDING: Any disputes or challenges regarding bids or tie bids will be settled by the auctioneer. His decision is final.

CERTIFICATE OF REGISTRY: A certificate of registry for each animal will be transferred to the buyer at the seller's expense.

ANNOUNCEMENTS: Any errors or changes in information contained in the catalog will be announced from the block and such announcements will take precedence over the information contained herein.

HEALTH: All animals are eligible for interstate shipment. Interstate health papers prepared by an accredited veterinarian will be furnished on each animal sold.

LIABILITIES: All persons who attend the sale do so at their own risk. The seller, auction facility, and sale manager assume no liability for any accidents that may occur. Neither does the seller, auction facility, or sale manager assume liability for the loss or injury to livestock due to theft, mysterious disappearance, sickness, improper handling or Act of God. It is to be clearly understood that the sale manager and its representatives act only as a medium between the buyer and the seller. They are not responsible in any way for the failure on the part of the buyer and seller to live up to their obligations or for the truth of any warranties or representation, express or implied. Neither does the sale manager assume any financial obligations to collect or enforce collection of monies between parties. Any legal action, that may in exceptional cases be taken, must be between the buyer and the seller. The sale manager will in no way guarantee the pedigrees or percentages of the animals selling, or data included, in this catalog. Any exceptions taken are between the buyer and the seller.

TRUCKING: Trucking can be arranged to coordinate loads for the least possible cost. If you know you'll need trucking, please contact Jason Batterson prior to the sale to make arrangements.

CONTRACT: The above terms and conditions of the sale shall constitute a contract between the buyer and seller and each animal shall be equally binding upon both. Each sale, or resale, of an animal constitutes a separate transaction.

SALE LOCATION: KIRKSVILLE LIVESTOCK, LLC.
24295 Benton Road, Kirksville, MO 63501

DELIVERY: Delivery is available to central points in surrounding states. \$100 discount off the purchase of any bull loaded out within 3 days. Bulls may be housed until May 1, 2025, for \$2.50/head/day.

BREEDING GUARANTEE: All bulls sell with a first breeding season guarantee.

Welcome!

Welcome to the 2025 Pasture to Pounds Bull Sale from the Batterson & Barnes families. We are 4th and 5th generation family farms located in northern Missouri and southern Iowa. First, we would like to thank you for the interest in our sale and in our cattle. We highly value our customers - past, present and future. We strive to produce fescue oriented, problem-free cattle with good performance. Our emphasis is on a female that can thrive in our fescue environment in an efficient and profitable package. Our purebred cattle are run in the same manner as our commercial producers. Our cows winter on stockpiled fescue, corn stalks with hay and mineral supplementation as needed. In our effort to provide our customers with as much information and data to help with their bull selections, we have added some new catalog and sale features:

Red Angus VALUE ADDED PROGRAMS

There have been some great initiatives brought forward by the Red Angus Association. First and foremost being the qualification of Red Angus cattle now being accepted on the majority of USDA Angus established grids with the packers. We are excited that Harold Bertz, Commercial Director for the Red Angus Association, will be at the sale to answer questions and go over some of the new incentives. Feeder calf certification, Premium Red Baldy, American Red, as well as numerous Angus grids now available. Please feel free to discuss these opportunities with Harold. He's a valuable resource and great contact.

RIF RESIDUAL INTAKE FEEDING

In trying to gather as much data as we can for our customers; we are now feeding a portion of our yearling bulls at the Werner Feed Efficiency Facility monitoring feed intakes and gains. We have been very pleased with how our bulls are performing against many different breeds of cattle. Information will be available sale day.

Thanks again for your interest. We truly feel honored for your time looking at our offering and look forward to working with your families. We stand by our bulls, if there is ever an issue, we will work to resolve it and make it right.

2024 & 2025 the Golden Anniversary date to the first Red Angus cattle purchase by Gerold & Peggy Eakins and the Birthdate to the Grand Ole Man Umpire 1000. Without their efforts and passion for the breed and cattle, we may not have had the opportunity to enjoy the cattle we do today. What they did and promoted in a short period of time still stands as a testament to what this great breed is about.

Grandfather needed a red bull, he relied on his good friend, Bloomfield native and herdsman at the time for Ankony Angus, Rex Harl, to find one. Rex found one in New York on the Black Angus SAYRE farm - same farm as Angus legend: Sayre Patriot. What happened from there was unprecedented and legendary to the foundation of the Red Angus breed.

Umpire was sired by Black Angus legend, Ankonian Dynamo, the 1970 and 1971 National Grand Champion and was later noted for his Pathfinder females and maternal influence to the Angus breed. His other black son, SAYRE Patriot, was also named back-to-back champion in 1972 and 1973. The only father-son duo to combine four back-to-back championships. Born in 1975, Umpire was the first Red Angus bull to be named two-time national Champion in the Red Angus breed - just like his sire and brother on the Black Angus side.

In 1981, the tough decision was made for Umpire to continue his legacy in other pastures, and he was sold at the National Western Stock Show in Denver. He sold at a record setting of \$64,000 - equivalent to \$221,000 today! Double Fork Ranch, John Robins and family, in Victor, Montana, made the purchase where he lived till 21 years of age. In visiting with John, he made the comment that at 15-21 years of age, we did not use the "Grand Ole Man" much. He later commented, "I wish we would have just to have more females." Today, 50 years later, Umpire 1000 ranks in the top 1% in the Red Angus data register for Stability EPD (the length daughters stay in a cow herd) & Herd Builder Index (cow herd building index). Only 25 bulls have the same stats with over half being descendants to the Grand Ole Man.

Cow-calf profitability is focused on the cow's ability to thrive in its environment and stay in production in an efficient matter from structure for longevity, foot shape, udder quality and, ultimately, fertility. Unfortunately, many breeders have lost focus and have been making breeding decisions from a computer screen based on EPDs and have lost focus on the fundamentals. Thank you to Rex, Gerold & Peggy, & John Robbins' family for promoting Umpire 1000 and his legacy on the breed.

The Red Angus breed continues to grow in popularity for all the right reasons. Black and Red Angus are both the same color under the hides. No different than Umpire 1000 and SAYRE Patriot, both Angus, one gene determined the hide color. The industry is demanding Angus cattle for the marbling. With EID tags and source verification and the recent announcement of the Sustainable Beef Plant in North Platte, Nebraska, Red Angus females continue to outpace their black counterparts for replacement females. The opportunity to capitalize on the feeder steers has the Red Angus cattle well-positioned for future growth.

REFERENCE SIRES

KJHT RITZ 0110

REFERENCE SIRE - LOTS 1-8

"You don't buy a herd bull you buy the cow family behind the bull." This has been a breeder quote that has treated our program pretty well over the years. In 2022 we made a road trip to our good friends and long time Red Angus Breeders, the Scott Taylor Family, in Tennessee. Hannah had aged out and Carter was looking for a female for his final year showing as a junior. Scott had a heifer we needed to see. While down there, we ran across two bulls both going back to the Paint Bucket Cow family. We stumbled into Ritz & Recluse. The first conversation we had when heading back home if we did not end up with the show heifer we needed to own one of those two bulls. Ritz was offered in the 2023 P2P. The comment was made that he was the most complete sire that they had seen offered in the 2023 Red Angus spring bull sale season. Ritz stamps his calves with that extra look, quiet disposition, wide based and chunked full of muscle, with a deep, square foot, big testicular development & his daughters udders are just as we had hoped. The 8 sons in this offering are a true testament to the breeding potential of this bull has. A unique opportunity that we are thankful to have with the Taylor family.

KJHT RITZ 0110

CINCH H37

REFERENCE SIRE - LOTS 20-24

"You buy a herd bull when you see one not when you need one." A quote I kept in the back of my mind yet never executed on it. In 2021 I attended a sale to keep current with new offerings and see what I could find with no intentions of buying anything. We ran into H37 he was as wide based, deep sided with that added pin width and dimension, big dark foot with growth in the top 3% - a true outlier that day. Ray Charles could find this guy. Backed by two proven sires PIE Cinch and Andras Fusion we rolled the dice not knowing much about the cow family. We got lucky the first sons offered in the 2024 P2P were well recieved. He stamps them just like he was made extra deep, with natural body width adding that extra skeleton to hang those additional pounds. Daughters are now in production and udders have turned out well. He will never make a show heifer he is a true commerical man's power bull that will produce a stout set of feeder cattle and easy keeping brood cows with a big tank for our fecue enviroment.

CINCH H37

BCC CREED 976H

REFERENCE SIRE - LOTS 29-34

In a short period of time Creed 151 has proven himself to be a reliable herd bull to add consistency, muscle shape, base width and structural quality. A unique combination of top donor females from the outcross Weaver Angus Missie, Brown Miss Revelation, James Montie his extendend pedigree is a culmination of many maternal fondations legends. Creed had a fun run on the tan bark. Analized by many of the top judges as complete no holes hard to pick a hole in him. He had no hair there was no fluff or wow factor. Just a real world bull. We are more excited of what he has done in the breeding pasture. Calving ease consistency, capacity with wide pin sets and dispositions second to none.

To put it simply , we are excited about what KJHT Ritz is going to do for the program. 140L Proud, Powerful with added prescence and the expected structural quality. A true herd bull candidate that should improve several different aspects of a cow heard. Our newest genetic offering by a first calf heifer sired by our selection from the C9CC dispersal. Tracing back to Ankonian Dynamo 21 times. The sire to the Grand Old Man Empire 1000, that has stood the test of time after 50 years and remains in the top 1% of the breed for Staybility & Herd Builder Index. Keep every daughter back. Foot & Udder quality bred in for generations.

145L & 140L peas in a pod and a testament to the consistency of this genetic combination and the breed leading females that back these two herdsires up. Big barreled three dimensional true beef bulls. We had full intentions of hanging a halter as a promotional sire, time did not allow. Presenting a unique opportunity for progessive cattlemen on March 28th. Negative birth with double digit CE. Bid with confidence. SHOW ME SELECT HEIFER QUALIFER.

If you are looking to add frame and added length of body by sure to look up 127L & 147. There is no doubt with the cow herd inventories at 60 year lows. Packers and feeders are looking towards hanging more meat on larger carcass. Sale topper on the Kalona Reports have been in that upper 1500-1700 live weights. The poultry industry followed by the pork all have increased carcass weights. Beef will have to do the same as the global protein demands increases with lower cow herd inventories.

You will drive your wheels off to try and find a thinker more dense made bull than 124L. Maternal great grand dam originated as the top seller from the Gayle Ingram herd in Texas that was an intensively line bred herd to Umpire 1000. A cattle breeder ahead of his time or one that bred for good cattle with longevity and believed in the concept of line breeding. Ignoring the epds race where feet and udder quality was passed to the wayside. Good cattle stand the test of time and surface to the top.

The Cinch H37 sire group was well received in 2024 P2P we expect this group will do the same in 2025 P2P. 750L will add muscle and shape into a set of feeder cattle.

Deep sided soggy made yet with a little shot of frame and added pin width and natural body width. His dam Rachel 234F has been a dual threat. The boys had a fun run at Junior National winning her class and reserve in division. More importantly she has gone on to be a consistent producer in the pasture and bull pen. 172M is the right kind he will catch you attention on sale day.

Big time good here top 15% growth with moderate BW. Dark red muscular, widebodied and stout. As soft made as they come yet has that extra pin width and dimension. This bull helps move the needle forward. Tough to find them made like this.

Smooth made, long as a well. Sleep-all-night calving ease specialist. 471B has placed several females back in to the herd we expect 151L to do the same. Longevity, fertility and ideal udder design all bred in. Made about as complete as they come hard to pick a hole in this one. Another one we had an eye on for a halter in 2024. Nice opportunity for someone in 2025.

Built a lot like 151L about a smooth as you can design with that added length of body. Another very nice option to utilize on either cows or heifers. Double bred outcross to the Weaver Angus Missie cow family in Illinois. If you are into making some show heifers. I have a feeling bred to the right set of females this guy has a little extra to offer all in that deep dark red package that everyone desires.

If you are looking to add the extra shot of frame with added body length into a set of cows be sure to add 128L, 137L or 142L to the short list. You will travel a long ways to find this much cow power and size in a set of red angus bulls. Finding big cattle can be done finding good big cattle with that extra body depth, natural body width and extra bone becomes a little more challenging. It has been a focus of our for 35 years. Now it is cool again to talk about it!!

Tracing back to McCumber Black Cap Cow family out of the Lonker Dispersal sale. N313 Made the short list when looking for the right kind of larger framed red angus cattle. Originating from the McCumber herd in North Dakota. A very maternal based program with that extra size. You will not find them any bigger and deeper than N313.
